Precipitation probability							
90%	90%	70%	60%	30%	20%	10%	10%

Forecast for Sunday 31 Jul 2022

Weather: Outbreaks of locally heavy rain and drizzle at first, becoming lighter and patchier through the morning. Becoming mostly dry through the afternoon with the cloud breaking, allowing some sunny spells to develop later in the day. Cloud initially low, bringing extensive hill fog, but this lifting and breaking into the afternoon.

Chance of cloud-free hill tops above 600m: Less than10% at first, slowly improving to 80% by late afternoon.

Low cloud and visibility: Extensive hill fog from 1-200m at first, especially in the west, leading to very poor visibility. Cloud slowly lifting into the afternoon so that only patchy amounts at 6-800m remain by late afternoon, leaving the majority of summits clear with good visibility.

Meteorologist's View

With poor visibility and slippery surfaces through the morning, along with difficult navigation conditions, it is advised to leave any assents to later in the day when conditions are more favourable.

Recent rainfall: measured at Neuadd: altitude 353m
